eCOX.com.hk

The latest in premium outdoor entertaining.

With our warm summers and mild winters, we have the ideal climate for a lifestyle of outdoor entertaining. Now more than ever, we demand contemporary, innovative designs to enhance our experience of cooking outdoors.

The outdoor room

Our outdoor living areas are a true extension of our home and how we live life. It's where guests, friends and family enjoy our company, our lifestyle and our cooking. That's why we want our barbecues to share the same premium qualities as our kitchen appliances. They need to be contemporary, functional and of stunning design. Sharing their own expertise in cooking surfaces with the visions of some of the world's best designers, Electrolux redefines 'alfresco dining'.

Electrolux integrated barbecue - the finishing touch.

With its smooth linear form, the Electrolux Integrated barbecue seamlessly translates the sophistication of your interior design to your outdoor entertaining area. It shares discreet design and attention to functional detail, offering the finishing touch to complement your outdoor vision.

Streamlined
Ergonomically designed controls on the side of the Electrolux Integrated barbecue ensure it drops seamlessly into any bench or working surface. The Electrolux Integrated is available with a roasting hood or discreet lid – depending on your design or cooking preference.

Thoughtful accessories
To keep your Integrated barbecue roasting hood looking as new, a weatherproof cover is available for purchase from spare parts. Spare stainless steel hot plates and split grill systems are available for purchase from spare parts if you wish to replace them.

Unique innovation
A superior oil management system drains oil and waste into containers that are easily removed from the top of the barbecue, while the unique angled surface drains oil away from the food for healthier cooking.

Superior protection
Outer surfaces are engineered from 316 marine grade stainless steel which is suitable for coastal areas. All other components are commercial grade stainless steel, ensuring your Electrolux Integrated barbecue will retain its appeal. Discreet and sophisticated, the Electrolux Integrated is the first truly integrated barbecue.

Electrolux induction cooktops-safe, precise and powerful.

Induction cooking will revolutionise your kitchen. No domestic cooking system heats faster, uses less power or is more precise and safe to use than induction.

Real star quality and performance.

Choosing the right hob to suit your kitchen and the way you want to cook is very important. The Electrolux range of hobs feature a stunning silver Induction model and a 'striking' flat design on gas hobs.

Induction hobs
Induction hobs work by a wire coil in the hob creating a magnetic field. When this field comes into contact with a material which can be magnetised, such as steel, enamelled steel or cast iron pans, the contents of the pan heat up. The benefits are increased speed and precision as the heat is distributed quickly and evenly throughout the pan.

Electric hobs
Our range of ceramic hobs complement the oven range perfectly. The design is simple, yet elegant, perfect for today's modern kitchen. There is a choice of rotary control or touch control models and the range includes two induction hobs. All standard ceramic hobs feature rapid power zones which react in under 5 seconds, saving time and energy.

Gas hobs
A range of flat design gas hobs giving the consumer great design lines coupled with safety and ease of use. Our gas hobs complement our range of ovens perfectly, with a flat design hob which is stylish and easy to use.
All feature automatic ignition, flame safety devices and cast iron pan supports.

Easy clean
We have designed our hob range so that it is so easy to clean. Less dirt traps and tight corners and with the ceramic hobs the glass surfaces are easily wiped over.

Touch controls
With our ceramic hobs you can quite literally have fingertip control with our sleek front touch controls, ensuring precise temperature control. On selected products there is also a 99 minute timer, which saves you having to check the clock.

Auto select
No more worries about your pans boiling over. With the 'Auto Select Function', your pan will be brought to the boil and then automatically turn down to the selected setting, so you don't have to stand over your cooking.

Triple crown wok burner
This is ideal for cooking the perfect stir-fry, giving you maximum heat, quickly and efficiently to ensure that your food is cooked perfectly.

Additional safety features
Featuring integrated electronic ignition for easy lighting and residual heat indicators, that light up to show if the surface of the hob is still hot. The gas hobs all feature thermocouples, which ensure the gas is cut off if the flame is accidentally blown out. Your safety is paramount when cooking in your kitchen.

WOK38TSIO

Millennium series 38cm induction wok

38cm ceramic | 1 rapid power zone | Front touch controls

Hob features:

- 38cm induction - ultimate control
- 300mm diameter wok zone with booster 3.2kW - for rapid response and economy

Maxisense induction cooking knows no boundaries.

Electrolux innovation brings you new induction cooktops which offer maximum cooking freedom and flexibility with professional results – for people who love to cook.

reddot design
award winner 2008

Ultimate flexibility
The maxisense induction cooktops are developed with three or four extra large induction zones, which detect pan presence and location and are not restricted to traditional circular zones. This allows pots of various sizes to be placed anywhere on the cooktop, provided they come into contact with the induction crosshair.

Large pans or pots can be placed horizontally across two zones (on the four zone model EHD68210P), while a number of smaller pans can be heated on the remaining available space.

Thoughtful design
The maxisense has all zones and controls at the front of the cooktop. This eliminates the need to reach over hot pans, whilst making full use of cooking space.

European style
The maxisense range is imported from Germany, finished in sleek black ceramic glass, clean bevelled edges and integrated electronic controls. Both hobs are perfectly styled to work seamlessly with the Electrolux E:Line range.

Stop and go
The simple to use Stop and Go function gives you the ability to leave the cooktop on a keep warm setting if you are called away. When you are ready to start cooking again, by pressing Stop and Go, the cooktop will return to your previous setting.

Electrolux hoods create the perfect atmosphere for the perfect meal.

With its emphasis on stir-frying and steaming, Asian cooking creates a lot of vapour, grease and odour in the air. And yet, more and more modern Asian households are adopting European open kitchen model. For this, you need a hood that clears the air with a combination of powerful air extraction and low noise. Electrolux hoods help keep grease, smoke and moisture out of the air, and away from your kitchen surfaces, walls and soft furnishings. And some of our hoods offer you a combination of built-in ambient and work lighting, so you can change the mood of your kitchen to suit any activity, whether you are cooking, serving or entertaining.

Fresher air and stunning designs.

The aesthetics of the Electrolux cooker hood range complement the other kitchen appliances as well as today's kitchen trends. The clever use of lighting including down lights and up lighters helping to create the perfect ambience for food preparation as well as dining.

To maximise the performance of the cooker hood, it is essential to install the cooker hood with the correct size of ducting, this will enable the cooker hood to extract virtually all the vapour, cooking odours and airborne grease from the kitchen and keep the noise level to a minimum.

Take your choice

Island hoods
Island hoods are designed to be suspended over a central cooking island thus creating a dramatic focal point in the kitchen.

Chimney hoods
Chimney hoods are designed to provide a visual focus whilst offering various styles and widths to suit your kitchen. These are designed to perform well and please the eye.

Telescopic hoods
Ideal for the kitchen where the hood needs to perform well and be out of sight. These hoods are fitted into the wall cupboard and then pullled out from the wall when needed.

Features

Ultra clean hoods clear the air silently and stylishly
The Electrolux-patented clog-free Dual Filter technology with oil collector, originally built for industrial kitchens, is now available for your home. It is suitable for Asian cooking, trapping even more oil from the air, and requires less frequent cleaning.

Powerful boost
Sophisticated electronic controls include a powerful and convenient boost option. During heavy duty cooking, the boost function can be used to maximise the fan speed for 1 minute (15m³/min) to effectively clean the air, before returning to the previous fan setting.

Seen but not heard
If you live, eat and entertain in the kitchen, then noise level is a matter - nobody wants to complete with a hood for ear-time! Our quietest hoods are just 42dBA.
